Summary

As a recent graduate, I am an enthusiastic and capable aspiring Computer Engineer, eager to apply my knowledge in Software development. Excels in fast-paced environments, demonstrating exceptional problem-solving skills and a keen eye for details. Committed to continuously learning and applying new knowledge to develop solutions that are focused on user needs, enhancing business efficiency and performance.

Education

Bachelor's of Computer System Engineering
NNU, Nablus, Palestine | 2018-2023

Professional Experience

Software Engineer | Orienteed

Jan 2024 - Apr 2024

- Gained hands-on experience in various projects and responsive web apps, enhancing skills in JavaScript/TS, React JS, bootstrap, Tailwind, ASP.NET and SQL.
- Demonstrated a proactive approach to problem-solving and project management.

Front end Developer | Freelancer

May 2023 - Dec 2023

A Front end developer created a responsive web application with React JS, integrating backend functionality for restaurants and bars. The aim was to offer customers a completely contactless digital menu experience.

Applications allow customers and businesses to browser, manage, view details and placing orders directly from mobile.

Technologies used: React.js, Redux, Rest API, Git.
